

### DATA SHEET

The Sequential Shift Light from CARTEK indicates to drivers the preferred time to shift up gear to gain maximum performance from their engine.

This fully integrated device is designed to be mounted onto the dashboard and works with most ignition systems and tacho signals.

The unit is quickly and easily programmed and requires just 3 electrical connections.

Shift Light Sequence

### FEATURES

- Fully integrated unit
- Fully programmable.
- Easy to install and setup.
- Compatible with most ignition and ECU rpm signals.
- Dash mountable unit, water proof.
- 70x20x30mm.

### CAN BUS SIGNAL CONVERTER

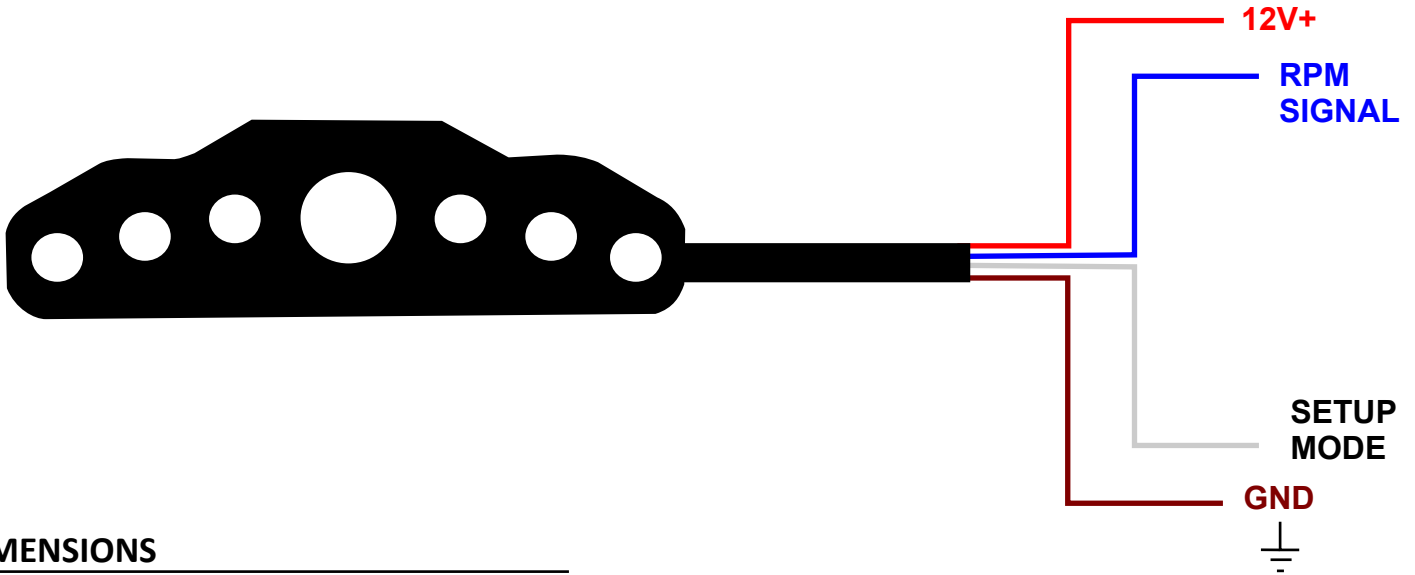

The **CAN-Bus Signal Converter** from CARTEK is suitable for cars that are equipped with CAN-Bus and do not have separate RPM and Km/h signal wires.

This device can be connected to the car's CAN-Bus cables and outputs the required RPM and Km/h signals on separate wires suitable for the Sequential Shift Light and Gear Indicator products.
